Education

Georgia Institute of Technology — Jan. 2026 – Present
Online Master of Science in Computer Science (Specialization in Computing Systems) — *Atlanta, GA/Remote*

Rutgers University – New Brunswick — Sep. 2020 – May 2024
B.S. in Computer Science and Math (GPA: 3.86/4.00 | Summa Cum Laude, CS Honors) — *New Brunswick, NJ*

Experience

Prudential Financial — Newark, NJ

Infrastructure / Cloud Engineer — *Jan. 2026 – Present*

- Engineered full-stack React and Python (FastAPI) features for the internal PruCloud console (pipeline redeployments, S3 file browser, multi-region DynamoDB failover) and re-architected core Python SDKs to enforce OAuth 2.0 and Secrets Manager across 10+ services
- Decomposed monolithic Azure Terraform state into 46 modular subscription repositories via automated Bash state-carving scripts and migrated CI/CD pipelines to OpenTofu and GitHub Actions with dynamic versioning
- Built event-driven AWS automation using Python (Boto3), Step Functions, Lambda, and EventBridge to decommission 10,000+ legacy CodePipeline stacks, automate multi-region account bootstrapping, and reconcile VPC CIDRs with Infoblox IPAM
- Reduced Apiiro SAST/SCA security vulnerabilities by 73% across foundational repos by enforcing S3-backed SSL certificate verification, refactoring frontend Dockerfiles for non-root execution, and resolving CFN IAM drift

Platform Engineer — *Jul. 2025 – Jan. 2026*

- Engineered custom enterprise web components (LWC/TypeScript), backend Apex services, and AI-driven workflow automations integrated with AWS and Genesys cloud services
- Spearheaded automated unit testing and WCAG/ADA accessibility compliance pipelines using Jest, improving UI reliability and test coverage across internal platforms

Full Stack Software Engineer — *Jul. 2024 – Jul. 2025*

- Architected and built 5 new microservices and interactive UI features for an enterprise ETL platform serving 10+ business units using Python (Flask, FastAPI), Java (Spring Boot), Angular, and PostgreSQL
- Re-architected a core Java microservice to process 1M+ record payloads without memory bottlenecks, and implemented multithreading and caching in Python services to cut API response times by over 75%
- Automated data dictionary migrations, JSON schema validation, and CI/CD deployments for 20+ containerized applications using Python, Docker, Jenkins, and AWS (ECS, Lambda, S3, SQS, DynamoDB)

Front End Software Engineer Intern — *Jun. 2023 – Aug. 2023*

- Built 10+ reusable Angular/TypeScript components for an internal UI library and implemented Adobe Launch telemetry in the Financial Wellness app, increasing event tracking volume by 80% and accuracy by 60%

Certifications

AWS Certified Solutions Architect – Associate (SAA-C03) (Aug. 2025)
Microsoft Certified: Azure Fundamentals (AZ-900) (Jan. 2026)

Personal Projects

Containerized Linux Home Server | *Linux (Debian), Docker, Networking, Bash, Samba* — Jun. 2025 – Present

- Configured and administer a self-hosted Linux server running multi-container Docker environments for media streaming, photo indexing, network-wide DNS sinkholing, and real-time vehicle telemetry logging
- Automated container lifecycle management, local SMB storage shares, and secure remote VPN access via Bash scripting

Personal Portfolio & Full-Stack API | *TypeScript, React, Deno, HTML/CSS, GitHub Pages* — Jul. 2025 – Present

- Engineered a responsive portfolio web application in React and TypeScript backed by a serverless Deno REST service to dynamically serve project, coursework, and certification data
- Reduced backend API invocations by 90% by designing an in-memory and client-side response caching layer

Technical Skills

Languages: Python, Java, TypeScript, JavaScript, C, C++, C#, SQL, Bash, Kotlin, HTML/CSS
Frameworks & Libraries: Spring Boot, FastAPI, Flask, React, Angular, Node.js, Deno, Boto3, Jest, Gradle
Cloud, Databases & DevOps: AWS (ECS, Lambda, EventBridge, S3, SQS, IAM, CloudFormation, CodePipeline, CloudWatch), Azure, Terraform, Docker, Jenkins, GitHub Actions, PostgreSQL, MySQL, DynamoDB, Git, Linux
